

## Mithraic Symbols Decoded - Decorated Rectangle

Of the 16 Decorated Rectangle Objects 4 are indistinct and the example at Newton of Lewesk of a rectangle and crossed line is considered to be a later addition resulting in 11 individual designs being drawn.

This individuality itself underlines the difficulty in decoding what these Symbols might mean from the complexity of the Golspie Object to the simplicity of the one at Grantown.

Golspie

Grantown

Some of these objects have elements of horizontal and / or vertical symmetry.

At this stage the author has no suggestions for a decode for these Objects – they may just be decorative.
